Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 4, 5, 13 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term “pressure” and “vacuum” in claims 4 and 5 are used by the claim to mean “therapeutic”, while the accepted meaning is “a fluid.” The term is indefinite because the specification does not clearly redefine the term.

As to claims 4, 5, 13 and 15, it is unclear how pressure and vacuum are regarded as a therapeutic agent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-10, and 12-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kwan U.S. Pat. No. 6,135,769.

Kwan discloses a microtube comprising: a tubular member (1); an interior axial opening (fig. 1); and a side port (3 and 2); Note: the device of Kwan is fully capable of performing the functions as set forth by applicant; as to claim 3, (fig. 1); as to claim 4-6, when the syringe applies a therapeutic agent (col. 3), it also applies the agent with pressure and a syringe action can be reversed to cause vacuum action. As to claim 7-10, 12-15, see above rejections; as to claim 16, see 2112.02 and above rejection; as to claims 17-19, (see above rejection).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 11, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwan.

Kwan discloses a micro tube substantially as claimed except for an outside diameter of about 10 to about one hundred microns, and an inside diameter of from about five to about fifty microns. It would have been an obvious matter of design choice to chance the size of the microtube, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).
